CAREER OBJECTIVE:

Software Engineer with expertise in Flutter development, focused on building scalable and user-centric mobile applications with strong performance and clean architecture. I bring a proactive attitude along with experience in Generative AI integration, working with LLMs and open-source AI models using Python. I am passionate about combining cross-platform development with AI-driven capabilities such as automation, chat-based systems, and smart recommendations to deliver efficient and impactful solutions.

EDUCATIONAL DETAILS:

Masters in Computer Application

Pune University
Aggregate : 73.23 %
Year of Passing : 2023

Secondary School Certificate

Maharashtra Board
Aggregate : 60.36 %
Year of Passing : 2014

Bachelors in Computer Application

Pune University
Aggregate : 60.00 %
Year of Passing : 2019

Higher Secondary Certificate

Maharashtra Board
Aggregate : 72.50 %
Year of Passing : 2016

SKILLS & PROFICIENCIES

- **Programming Languages & Frameworks:**
 - **Mobile App Development:** Proficient in Dart and Flutter with 6+ years of experience in building scalable, cross-platform mobile applications, including app store deployment, performance optimization, and CI/CD pipeline integration.
 - **Generative AI & LLMs:** Hands-on experience with Generative AI integrations, working with LLMs and open-source AI models using Python for building intelligent features such as automation, chat-based systems, and smart recommendations.
 - **Web Development Expertise:** Skilled in Flutter web, with frontend experience in React and Angular, supported by practical application in developing responsive web solutions.
 - **Database & Cloud Proficiency:** Experienced in Firebase, MySQL, AWS RDS, and MongoDB, along with working knowledge of AWS and Azure for scalable cloud deployment and backend integration.
 - **Development Tools & Agile Practices:** Proficient in GitHub, Bitbucket, and JIRA for version control and Agile workflows, with experience in CI/CD pipelines and development across Windows and macOS environments.

EMPLOYMENT DETAILS

6/2024 **GOSI (SENIOR SOFTWARE DEVELOPER | RIYADH, KSA ONSITE)**

- **Technical Expertise:** Deliver robust, scalable code, design application architecture, and ensure best practices, security compliance, and seamless integration of AI-driven features such as GOSI Brain and dedicated AI chatbot solutions.
 - **Leadership & Collaboration:** Conduct code reviews, actively participate in business and solution-driven discussions, and contribute to AI initiatives including CodeFaster (Figma-to-code) and BRD-to-testcase automation projects.
 - **Performance & Alignment:** Develop efficient, reliable web and mobile applications aligned with organizational goals, integrating intelligent automation and AI-enhanced user experiences.
 - **Solution-Oriented Approach:** Contribute to strategic technical discussions to identify, design, and implement impactful solutions, including AI-powered workflows and scalable system improvements.
-

01/2023 **INNOVECTURE PRIVATE LIMITED (TECHNICAL LEAD | PUNE)**

- 06/2024**
- **Leadership:** Lead a team of six in developing features and troubleshooting for the Pine App, focusing on code reviews, feature discussions, and active development.
 - **Client Engagement:** Analyze and respond to client technological needs, guiding architectural decisions to optimize app functionality.
 - **Performance Enhancement:** Develop and implement a Maturity Model to enhance existing product performance, focusing on code optimization to improve user experience.
-

12/2021 **HOXTON CAPITAL MANAGEMENT (SENIOR SOFT DEV | DUBAI ONSITE)**

- 01/2023**
- **Leadership & Strategy:** Spearheaded a team of Flutter developers, guiding the design and architecture of a cutting-edge fintech application.
 - **Technical Expertise:** Successfully led the implementation of clean architecture principles and the Bloc pattern for robust state management, enhancing app functionality and performance.
-

5/2021 **PAGESUITE PRIVATE LIMITED (FLUTTER DEVELOPER | REMOTE PUNE)**

- 12/2021**
- **Development & Client Interaction:** Core team member focused on feature development and rigorous bug fixing. Engaged closely with clients to understand their needs, ensuring the delivery of tailored software solutions.
 - **Technical Implementation:** Played a key role in developing a SaaS product using MVVM architecture, enhancing app responsiveness and maintainability. Expertly implemented Provider for state management, optimizing app performance and user experience.
-

9/2019 **EXALTARE TECH PRIVATE LIMITED (SOFTWARE DEV | PUNE)**

- 5/2021**
- **Professional Growth:** Began as a PHP developer and progressively expanded my skills into mobile application development, successfully delivering over five diverse applications across E-commerce, IoT, Standalone, WooCommerce.
 - **iOS Development:** Furthered my technical expertise by adopting Swift, developing advanced iOS applications that meet modern functionality standards.
 - **Client Interaction:** Actively participate in client consultations to capture unique requirements, leading mobile development team to align project goals with client needs.
-

5/2018 MEGAMIND SYSTECH PRIVATE LIMITED (JUNIOR SOFT DEV | PUNE)

- 9/2019
 - Development Skills: Initiated my career as a Junior Developer, primarily using PHP with the CodeIgniter framework to develop robust websites and manage backend functionalities using MySQL databases.
 - Client Interaction: Actively participated in client meetings, contributing to discussions that helped clarify business requirements and align project objectives with client expectations.
-

PROFESSIONAL EXPERIENCE

Government Insurance - GOSI, Saudi Arabia (Senior Flutter Developer)

- **Key Responsibilities:**
 - Enhanced user experience, improving app speed, reliability, and usability.
 - Implemented E-Certificate verification, SANED eligibility checks, and insurance dues management.
 - Integrated secure real-time transaction tracking for better user visibility.
 - Developed robust authentication and privacy-focused features, ensuring high data security standards.
 - Built an AI-powered chatbot for user support and query resolution.
 - Developed AI task completer to automate workflows and improve productivity.
-

GOSI Employee App - GOSI, Saudi Arabia (Senior Flutter Developer)

- **Key Responsibilities:**
 - Enhanced user experience across GOSI platforms, improving speed, reliability, and usability.
 - Implemented key features like E-Certificate verification, SANED eligibility, and insurance dues management.
 - Integrated real-time transaction tracking for better transparency and user awareness.
 - Built secure authentication and privacy-focused features aligned with enterprise standards.
 - Developed AI-driven solutions including chatbot support, automated MoM generation, and AI-assisted MR reviews.
 - Monitored and optimized system performance using analytics and AI-based insights.
 - Contributed to architecture decisions, code quality, and mentoring as a senior developer.
-

CodeFaster - AI-Powered Code Generation Platform (Flutter and Gen AI with Py)

- **Key Responsibilities:**
 - Developed AI-powered platform converting Figma designs to production-ready Flutter, Angular, and Java Spring Boot code.
 - Implemented RAG-enhanced AI system using OpenAI and GOSI Brain with vector stores for GOSI Design System integration.
 - Built an automated BRD-to-Test-Cases generation feature producing Xray-compatible test scenarios from requirements.
 - Architected multi-framework code generation with GetX architecture, supporting a complete MVC structure and API documentation.

Diggato - AI Collectibles Cataloging Platform (Flutter and Gen AI with Py)

- **Key Responsibilities:**

- Developed Flutter app integrating OpenAI Vision API and Google ML Kit for automated object identification and OCR text extraction.
 - Implemented RevenueCat-based subscription system with freemium model (20 free scans) and premium upgrade flow (\$6.99/month).
 - Built AI analysis engine supporting multiple providers with category-specific data extraction and marketplace price estimation.
 - Architected Firebase backend with Firestore, Cloud Storage, social authentication, and analytics integration.
-

Pine App - Baptist Health, USA Florida (Technical Lead | Flutter)

- **Key Responsibilities:**

- Led development of Pine App, a scalable healthcare solution, ensuring compliance and high-quality delivery.
 - Managed end-to-end development with focus on secure auth, appointments, and health tracking.
 - Delivered features like 24/7 virtual consults, digital onboarding, and real-time monitoring.
 - Integrated secure payments, smart queue management, and medication/allergy tracking.
 - Enabled real-time health data access, document management, and biometric + SSO (Okta) login.
 - Enhanced platform with AI-driven insights, automation, and continuous improvements based on user feedback.
-

SynqSol - Mental Wellness & Compatibility Platform (Flutter & Gen AI)

- **Key Responsibilities:**

- Developed full-stack mental wellness platform with 100+ AI-augmented psychometric assessments, real-time validation, and multi-level psychological profiling (OCEAN traits, cognitive abilities, behavioral patterns).
- Implemented dual-user compatibility matching system with searchable database, multi-dimensional analysis matrix, and automated request management for relationship and professional partnerships.
- Built complete e-commerce solution featuring dynamic cart management, coupon engine, payment integration, and checkout flow for psychologist-verified reports and subscription services.
- Architected GetX-based state management with clean MVC architecture, RESTful API integration using Dio, and responsive design supporting web and mobile platforms.
- Developing Gen AI report generation system using Python, Google Gemini, and Hugging Face LLMs (Qwen) to transform raw psychometric data into personalized, actionable insights.

Provider Hub - Baptist Health, USA Florida (Technical Lead | Flutter)

- **Key Responsibilities**
 - Led the development of Provider Hub, an internal app for doctors, to manage appointments and patient interactions.
 - Directed app development to streamline doctors' workflow, focusing on appointment scheduling and tracking.
 - Implemented audio recording for doctor-patient conversations, integrated with backend systems to generate and edit summaries.
 - Ensured seamless access to daily schedules, patient details, appointment status, and information on the next patient.
 - Enhanced app functionality with features like automated summary generation and review for improved medical record-keeping.
-

Fintech Application - Hoxton Capital, Dubai (Lead Flutter Developer)

- **Key Responsibilities:**
 - Engineered comprehensive financial analysis tools, including net worth evaluations and real-time stock updates via Yahoo API, enhancing decision-making and investment tracking.
 - Developed robust payment card integration and wealth management features, such as a Wealth Vault and Retirement Calculator, providing secure document storage and sophisticated financial planning capabilities.
 - Pioneered financial planning tools within the app, enabling users to seamlessly manage and monitor personal and investment finances, supporting tax-efficient strategies and comprehensive investment management.
 - Implemented custom financial advisory services, utilizing advanced technology to offer personalized strategies, goal setting, and long-term financial planning, aligned with clients' unique financial circumstances and aspirations.
-

Digital News and Magazine App - PageSuite (Flutter Developer)

- **Key Responsibilities:**
 - Developed cross-platform functionality for a sophisticated digital publishing platform using Flutter, enhancing both iOS and Android app performance.
 - Integrated method channels for native functionality access, and implemented advanced push notification systems using cloud messaging and in-app messaging to boost user engagement.
 - Utilized comprehensive analytics tools like Adobe Analytics, and Google 360 to monitor app usage and optimize content delivery based on user interaction data.
 - Employed text-to-speech capabilities and flexible template designs to enhance the reading experience, along with features for offline reading.
 - Developed and integrated various subscription models and advertising options to effectively monetize content and encourage user subscriptions through a gated access strategy.

Sales Force Automation for CPG Group - Synergy ERP (Lead Flutter Developer)

- **Key Responsibilities:**
 - Led the development of a robust Sales Force Automation app for the CPG group, built to optimize sales operations and enhance field force productivity.
 - Spearheaded the creation of features for intelligent product inventory management, ensuring efficient stock handling and order processing.
 - Developed comprehensive tools for monitoring sales performance, including custom dashboards and drill-down reports.
 - Automated the creation of effective sales beats and delivery plans, streamlining field operations.
 - Implemented modules for on-ground scheme execution, leave management, and expense tracking, enhancing operational efficiency.
-

ACTIVITIES AND INTERESTS

- **Professional Development & Leadership:**
 - Visiting Faculty, Pune University: Delivered sessions on Flutter and modern web/mobile development practices.
 - General Secretary, Pune University: Led student initiatives for two terms, driving events and engagement.
 - Workshop Lead, Innolabz: Conducted hands-on Flutter training for developers.
 - **Awards & Recognitions:**
 - Runner-Up, Mr. Fresher Thane 2018: Recognized for confidence and presentation skills.
 - **Skills & Engagement:**
 - Active in hackathons and real-world problem solving.
 - Strong in end-to-end project delivery, team leadership, and stakeholder coordination.
 - Skilled in Flutter, web/backend development, and AI integrations (chatbots, automation tools).
-

PERSONAL DETAILS

- **Full Name** : Karan Chandrakumar Gore
- **Known Languages** : English, Hindi, Marathi, Telugu
